Pepperjam Store Builder™ beta

1 Select Products **2** Filter Results **3** Customize

Select the merchant(s) feeds and / or product categories you'd like to display in your dynamic storefront. All merchant feeds display the amount of products available within that program. Scroll down to see a LIVE demo of the actual results from your selection. Move to the next step if you'd like to filter your results by keyword.

If you want to refine your results to specific products (i.e., ipod) or groups of products (i.e., shoes) simply filter your results by keyword. Leaving this section blank will display all available results for the program(s) or categories you've already chosen. Here you can also select the default amount of products you'd like to display per page.

Customize your dynamic storefront with colors that match your Web site. As you change the colors you will see them within your LIVE demo area. Here you also have options to customize your search button or bypass this feature and use your own search technology.
